

HER MAJESTY'S SECRET SERVICE

M.I.6

MINISTRY OF INTELLIGENCE DEPARTMENT

*** ACTION ADVISED ***

SUBJECT: Noah Wieser (Alias: unknown)

Age: 32

Height: 5'8"

Weight: 150

Date: 03-03-1967

Background:

Promising electronics engineer, graduate of University of Potsdam in East Germany. One of our sources in the East German Stasi reported a failed attempted to recruit Wieser in 1963. Wieser fled into Western Europe. Further information unknown.

22-02-1967. SigInt indicated Stasi activity on Sardinia.

01-03-1967. UK Diplomatic Attache, Paris, received a message purportedly from Wieser, offering plans for a infrared detection system in exchange for asylum. Message included sample page from Stromberg Electronics.

Comments:

Presumably, Wieser has been living in Western Europe under a false identity. His training would make him an attractive employee for the Stromberg Electronics lab in Sardinia.

Assessment:

MOD analysis suggests sample page may be genuine.

Stasi may have attempted to repatriate Wieser. If Wieser became aware of the Stasi presence on Sardinia, he may have fled.

Mission Analysis advises positive action.
