### History

Started art school, fell deeply in love with Celia, we started a relationship that held on throughout art school. Me and Celia made a large installation, using our very sketchy interface skills and newly acquired jacks, on the net. Not being a fan, a government official shut it down hard, gets me 3 years in prison. I befriend some booster gang members in prison. Out of prison, I get back to art school, maybe a for a phd? I fuck around and not thinking Celia cares anymore, hardly heard from her during the years in prison, obviously hurt her in some way, so she backstabs me in some way? Maybe turning the art community around? On the outside I don't really care, on the inside I fucking bleed. Besides cybernetic installations (thinking discarded human tissue, animals, cybernetic) I do quick runs for myself and other to finance the final years, easy money, but starting to think about some grand thing, arranging ice on the net, a installation spanning the whole net? Old childhood friend reconnects with me, maybe an aspiring artist I take under my wings?
